

CantaRem

eight to sixteen
outboard faders
for Cantar

CantaRem is a slim and portable control surface offering eight linear faders that can be assigned to any of the nine analog input potentiometers (five mics, four lines), or the six magnetic mix output faders of Cantar. The remote control assignments are configurable on the fly from the Cantarem built-in keyboard.

CantaRem relies upon ultra smooth 83 or 104mm* stroke faders; its slim profile makes it very comfortable for the wrist, and it is thin enough to be placed in front of Cantar without hiding the modulometers nor hindering

access to the display panel push buttons. The fader actuators are protected during transport under the swiveling electronic interface housing. The connecting sockets are oriented in such a way they are 'nested' inside the surface area during transport, and directed toward Cantar in operational position.

Two CantaRems can be ganged to control up to sixteen analog and digital faders.

Closed: 240 x 135 (153) x 43 mm. Open: 240 x 212 (230*) x 28 mm*
Weight: 650 gr. Sockets: Lemo6 to the Cantar Dsub15, Lemo5 transmits
